

bMOTTURA

The new smart access experience

With bMOTTURA, you can manage doors, gates and garages from your smartphone in a simple and secure way. Your key becomes digital: enjoy smart access, real time notifications and full control wherever you are. Perfect for homes, offices, studios, small businesses and B&Bs, the app lets you organise and monitor every entrance with flexibility, adapting to your needs.

safeguarding your security

P190610ENG - 04/2026

Simple, personalised access management, nearby and remotely.

With bMOTTURA you have full control over your access points. You can create **personalised codes for guests**, collaborators or family members, deciding exactly who can enter and when. You're free to **generate temporary or permanent invitations**, schedule recurring access, or limit entry to **specific time slots**, ensuring every authorisation reflects your needs.

At any moment, you can revoke a permission with a single action, maintaining maximum security at all times. And thanks to **access history and real time notifications**, you always know what's happening and can monitor every movement with complete peace of mind.

For those managing a B&B or holiday home, this means eliminating physical key management entirely and automating check in in a professional and secure way.

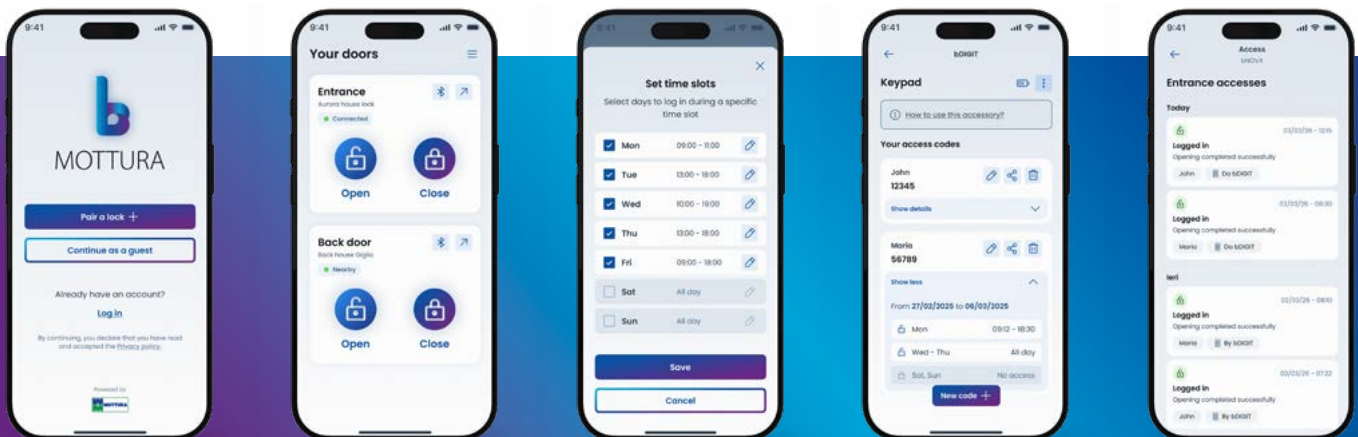

With a single account, you control all your Mottura smart devices, from locks to accessories.

For remote connection, you need to install bBRIDGE, the device that enables remote control of all products in the Mottura bTECHNOLOGY range.

Mottura security and reliability

bMOTTURA is built on over 50 years of Mottura expertise in the security sector.

Smart technology integrates with the highest levels of protection to offer you an advanced, intuitive and secure management experience. Security evolves, your life becomes simpler.
