

bMOTTURA

The new smart access experience

With bMOTTURA you can manage doors, gates and garages from your smartphone easily and securely. Your key becomes digital: smart access, personalized codes, temporary invitations, time-based permissions and real-time notifications ensure precise and flexible access management, tailored to every user's needs.

safeguarding your security

P190610ENG - 04/2026

Simple, personalised access management, nearby and remotely.

With bMOTTURA you have full control over your access points. You can create **personalized codes**, define who can enter and at what time. You're free to **generate temporary or permanent invitations**, schedule recurring access and limit entry to **specific time slots**, ensuring every authorization truly reflects your needs.

At any moment, you can revoke a permission with a single action, maintaining maximum security at all times. And thanks to **access history and real time notifications**, you always know what's happening and can monitor every movement with complete peace of mind.

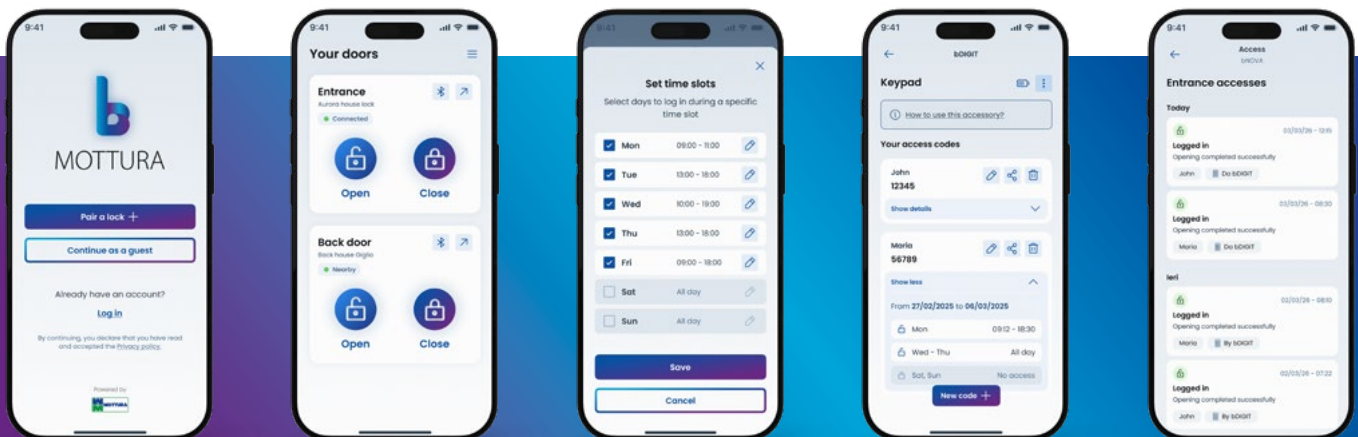

With a single account, you control all your Mottura smart devices, from locks to accessories.

For remote connection, you need to install bBRIDGE, the device that enables remote control of all products in the Mottura bTECHNOLOGY range.

Mottura security and reliability

bMOTTURA is built on over 50 years of Mottura expertise in the security sector.

Smart technology integrates with the highest levels of protection to offer you an advanced, intuitive and secure management experience. Security evolves, your life becomes simpler.
