

WHAT CAN I DO WITH ULIXE?

Manage different Mottura devices

Check opening/closing operations nearby

Manage B&B services

Manage the settings of the devices

Display Mottura products

Check the closest Mottura Clubs

Display products' instructions and manuals

M A N A G E

BLUETOOTH APP FOR SMARTPHONE
YOUR B&B, FREE OF CHARGE

OPEN THE DOOR

Install the app and pair it to the lock or to XMOTO knob: you can open and close with your smartphone, which will send a Bluetooth signal that the lock will recognize. No need of internet connection: BLUETOOTH SIGNAL DOES NOT INTERFERE WITH OTHER EXTERNAL SIGNALS.

MANAGE B&B SERVICE

UliXe is the easiest way to manage your B&B. Guests are free to check-in and check-out anytime by themselves. There is no need to be there physically. Very easy installation. As safe as Mottura.

MOTTURA X TECHNOLOGY

Mottura X Technology widens its range of Bluetooth peripherals, technologically updated and performing, along with the cutting-edge innovation. Mottura X Technology, safety-friendly, combines the highest level of security and ease of use.

EVOLVING LOCK

safeguarding your security

MADE
IN
ITALY

XMoto (art.XMP01) is a smart lock designed to easily open and manage your lock without using a physical key. Thanks to the onboard Bluetooth system which allows the management of the lock and the B&B services with the exclusive app Ulixé and the dedicated peripherals.

Bluetooth peripheral with keyboard and transponder reader, powered by batteries (art. 99.779) or by mains (art. 99.780), suitable for:

- RESIDENTIAL USE (master and service codes)
- B&B SERVICE (without internet connection)

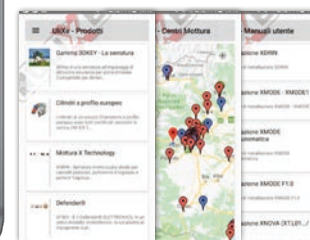

Bluetooth peripheral with fingerprint and transponder reader, powered by batteries (art. 99.781) or by mains (art. 99.782), suitable for:

- RESIDENTIAL USE (with the possibility of imprint master and service)

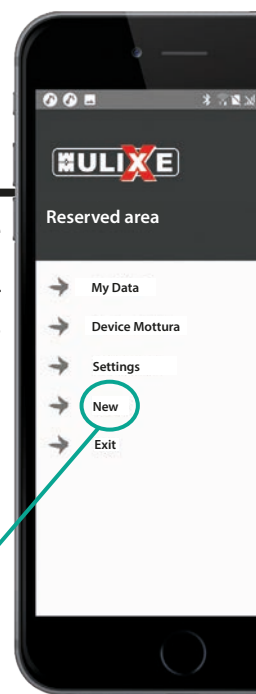

PUBLIC AREA

You can check the closest Mottura Clubs, discover all new products and check instructions.

RESERVED AREA

You will have to create your (free) account and then surf the app to pair and manage the locks and B&B service.

ADD A LOCK AND FOLLOW THE DRIVEN CONFIGURATION

ACCESSORIES

99.783

Door position bluetooth sensor, for automatic closing. Featured with dry contact. 2 finishes available.

99.793

Double key cylinder connection adaptor.

99.772

Master electronic key has its own code, for the highest security. The knob will be paired to the master electronic key after the first connection and this key will be necessary to add any other device.

99.794

Extension jack for knob provision

SIMPLE AND EFFECTIVE MANAGEMENT OF B&B SERVICE

The rolling code system permits to manage B&B service without internet connection. The device and the smartphone, after being paired nearby, are able to generate the same codes from apart.
